ABSTRACT

The word "transformation" means the changes occurred and it is actually witnessed by people. In India, the "transformation" was started after independence. But in freedom movements also we can see the glimpses of transformation can be witnessed. The transformation brought so many changes in all fields including the update changes in science and technology and still we are witnessing the impacts of transformation in India. There are so many transformations in India, and now we are witnessing like digital transformation in India. For example. Now most of the Indians are still using digital money like Google pay bheem etc. Even the small footpath sellers are also use QR code which is the main concept of digital transformation

INTRODUCTION

The world “transformation in India” was witnessed even before independence and, after independence, it gained importance. The transformation in India may be witnessed even before independence are they were as follows:

1. Formation of constituent assembly.
2. Religious reform movements.
3. Uniform system of administration.
4. Transportation and communication.

Formation of Constituent Assembly

When freedom movement was going on, there is also a concept of constituent assembly was started to form the constitution. In 1946, the constituent assembly was formed and the Indian constitution came into existence in January 26, 1950.

Religious Reform Movements

The religious reform movements which were started during the British rule, were having a goal of removing bad practices from Hindu society and purification in Hindu society.

Rajaram Mohan Roy is considered as the father of “renaissance” He is also considered as the father of modern India. Due to his efforts in 1829, Lord William Bentinck abolished the sati system in India. He stressed the education of girls and also widow-remarriage system.

The remaining reformers also tried to remove the bad practices like child marriage, blind beliefs from the Hindu society.

Uniform System of Administration

The British introduced the uniform system of administration and during the British period, whole India became a single, large country. It means the rules and regulations made by the British was applied to Indians irrespective of caste and religion.

But it made the way to the real transformation in India. The India and forgot their religious differences and they were united to achieve the freedom. (Indians started to understand the concept of equality and liberty.

Transportation and Communication

The transportation and communication introduced by the British is made the way to creation of transformation in India. By this transportation, the people were united irrespective of caste and religion differences. The transportation was became the main reason of the transformation in India.

The British were also introduced the communication system also. The communication was started by British were to send the messages to their administrative reason. Bu it was also a main reason for the transformation in India also.

LITERATURE REVIEW

Cultural Transformation

The Indians are who were in the traditional approach are now in the edge of cultural transformation. Even though the Indians are celebrating the festivals like Deepavali, Dasara Ganwasha festivals, are now in the edge of cultural transformation.

Scientific Transformation

Now India is in the form of scientific and technological formation. We had the prestigious organizations like ISRO, DRDO and we are in the process of scientific transformation. We are using the artificial satellites to get signals and we are in the form of Mangala yana, Chandrayana etc.

Mass Communication Transformation

In mass communication, we have seen so many revolutionary changes. After independence, we had the system of AIR which is also called as "AAkashvani" which was popular everywhere. The radio was the main mean of entertainment and after DELHI Doordarshan was became the main medium of entertainment.

Nowadays we had so many channels in many regional languages, and in radio also FM radio channels are entertaining the people.

Social Media Transformation

Nowadays the present period is considered as the period of social media. This is started due to globalization and revolution of internet. The social medias like whatsapp, twitter, facebook, instgram etc are attracting the young generation. They are used to serve in many periods like job portals, matrimonial columns are now helping the people also. Most of the talents are exposed to new world by proper utilization of social media.

Linguistic Transformation

Linguistic transformation is also the main transformation in India. There are 22 languages were officially in our constitution. But still, the languages like Maithili, prakrit, Bhojpuri etc are also used by many people in our India.

In Karnataka, there also languages like Tulu, Lambani, Konkani are also languages are spoken by people. But in the era of globalization, the most number of people are using English because it connects the people of other countries as well as other continents also.

Transformation in Agriculture

In the edge of globalization, the industries, transport, communication are having more prominence in every country's economic development. But agriculture is the oldest and wide spread occupation in India. In India more than 58% of the people are still practicing agriculture as the oldest and traditional occupation in India.

But now due to the influence of globalization, now the traditional and Indian style of agriculture is transforming into modernized agriculture in India. The farmers are using modernized methods like Javari and hybrid seeds, tractors, tillers, irrigation system, harvesting machine, pesticides etc are the examples of agriculture transformation in India.

Transformation in Industrial Sector

Industries are the most contributed fields to our economic development. The industries which are classified as agro based industries, forest based industries, mineral based industries are transforming into technology based industries and the means of earning foreign exchange.

Economic Transformation

Basically the economic structure of any country may be classified as primary sector, secondary sector and tertiary based sector. Now due to usage of updated science and technology, there is economic transformation as import and export based, the international treaties are the makes the economic transformation in any country.

METHODOLOGY

In this methodology, we can say that, there are a number of strategies were used as a methodology. In this methodology, just we are checking, how India accepted transformation and how it influences the world also.

Figure 1. About the World of Work

The actual transformation was started in India during the time of British also. Due to uniform system of administration, and English school of education, the radical changes were witnessed in the thoughts of Indians. The thinking of Indians were changed and with the freedom movement, there was another movement of transformation was also witnessed in India.

After the independence, the transformation in India was started with the collaboration of science and technology also. In the name of transformation in India, we are witnessed the green revolution, radical changes in telecommunication was started with BSNL, and also up to 5G and with the competition of the private companies also.

In the way of transformation, India has accepted globalization, privatization and liberalization also. MultiNational Companies are came to India and India had entered in the era of new economic policy.

Figure 2. About India's Transformation

Totally we can say that, in this methodology new steps are taken to explain the concept of transformation in India.

Objectives

- To study about the ways of transformation which were in different types.
- To study the consequences to happenings of transformation in India.
- To study the effects of transformation in India.

RESULT AND DISCUSSION

By studying these papers, we can get many points also. The transformation in India was held even before independence and also after independence also. Before independence, the transformation was started in the life of Indians. During the British period, when freedom movement was going on, there were a lot of changes were witnessed.

Whole India came under the British control and uniform system of administration was implemented in India. Civil and criminal court system were started and people were witnessed the court system in the place of panchayaths. The British were introduced the new English medium school education system in the place of Indian traditional gurukula system. . The Indian students were started to learn the principles of democracy, liberty, and equality and the Indians started to compare the condition of India with other countries.

The reform movements were started in the 19th century and the reform movements to make changes in the Hindu society. The main aim of reform movements is to remove bad practices in Hindu society like child marriage, sati system etc. By this, the people were witnessed the changes and there was stress on the education of girls. The educated Indians were started to oppose bad systems in the Hindu society in the name of tradition.

After independence, also, there were many changes were witnessed in India. To boot the economic development in India, after independence, the India started the five year plans in India.

After independence many bills were passed to stop child marriage and dowry system. Stress was given to girl's education and " Sarva Shiksha Abhiyaan" was started to eradicate illiteracy.

Many schemes like NAREGA, Jawahar Rojagar Yojana was started to remove unemployment.

By this we can say that, the transformation system which were started, before independence and after independence, were brought drastic changes in almost all fields.

Digital India

In this way of transformation, we should remember that digital India is the also in the way of transformation. The people in India started to use google pay, phone pay, Bheem app etc by which the people started to processing the cashless transaction is the revolution in the way of transformation in India.

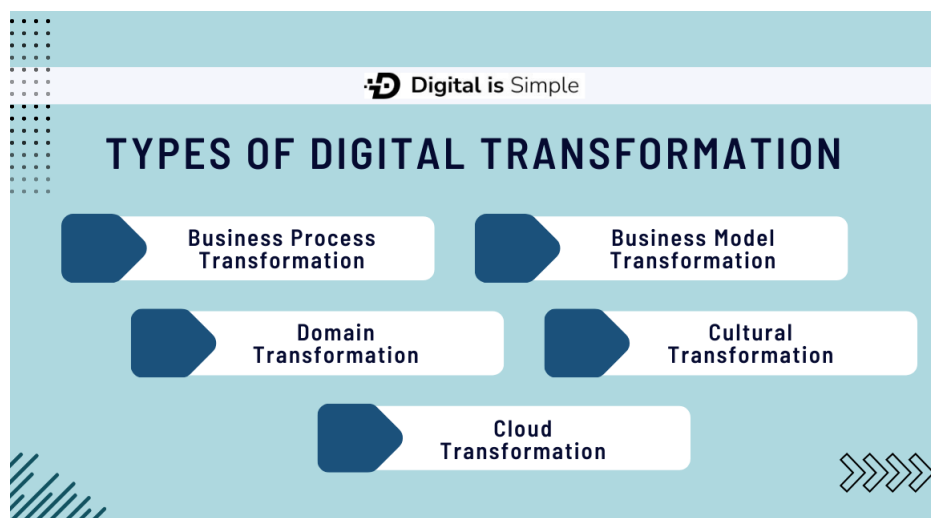

Figure 3. About Types of Digital Transformation
